MEHMET BAYRAM ALPAY

MACHINE LEARNING ENGINEER

SKILLS

- LangChain, LangGraph, LlamaIndex
- LLMs, Agent Orchestration, RAG
- Deep Learning, Machine Learning
- TensorFlow, PyTorch, HuggingFace
- Python, C, SQL

LANGUAGES

- English - B2
  IELTS - 6.5
- Turkish - Mother Tongue

SOCIETIES

Google Developer Student Clubs
Ankara University
May 2023 - Jun 2024

EDUCATION

Ankara University

Bachelor's Degree
Computer Engineering | 2020-2024

PROFILE

I am deeply passionate about artificial intelligence and committed to advancing my skills. With a strong technical background in deep learning, NLP, and large language models, I focus on building practical and scalable AI systems. Recently, I have been working on agent orchestration, Retrieval-Augmented Generation (RAG), and LLM pipelines within production environments. I stay up to date with the latest developments and enjoy turning research ideas into real-world solutions that create meaningful impact.

WORK EXPERIENCE

NOVUS

Machine Learning Engineer| 26 August 2024 - Present

- I actively contributed to the development of agent orchestration and RAG pipelines within DOT and took part in designing and implementing scalable API integrations. I played a key role in building robust LLM workflows using LangChain, LangGraph, and LlamaIndex, with a strong focus on performance and privacy.

ASELSAN

INTERN | 24 June-22 July 2024

- Developed a web application to analyze system logs and JSON files using React, Redux, TypeScript, and Ant Design. I gained practical experience in frontend development and integrated modern web technologies into existing company systems.

CBOT

INTERN | 12 February-3 June 2024

- At CBOT, I gained experience in report preparation, chatbot testing, flow design, and intent operations.

SMARTMIND

INTERN | 21 August-18 September 2023

- I was involved in the development of a project focused on detecting personal identifiable information, utilizing the NER-BERT model. In this capacity, I actively contributed to both the development and implementation phases of the solution.

CERTIFICATION

Natural Language Processing Specialization

COURSERA - DEEPLEARNING.AI | MARCH 2024

Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization

COURSERA - DEEPLEARNING.AI | MARCH 2024

Generative AI with Large Language Models

COURSERA - DEEPLEARNING.AI | MARCH 2024

Neural Networks and Deep Learning

COURSERA - DEEPLEARNING.AI | MARCH 2024

Machine Learning

COURSERA - DEEPLEARNING.AI | MARCH 2023

- Unsupervised Learning, Recommenders, Reinforcement Learning | March 2023
- Advanced Learning Algorithms | February 2023
- Supervised Machine Learning: Regression and Classification | January 2023
